## Quality Policy

Michigan Die Casting is dedicated to quality and continuous process improvement for both customers and employees. Our responsibility is to ensure that through established standards and measurements, the level of quality at MDC matches or exceeds our customers' expectations.

We develop quality awareness through process improvements, training, measurements, and development of our employees.

Quality is an integral part of our commitment to world-class products and customer service. Our quality process includes:

- Verifying and validating both existing and new program functions.
- Researching improvements to add to the quality of our products.
- Helping to define and improve our products through involvement with our employees and our customers.
- Conducting internal quality audits and management review for an ongoing evaluation and improvement of our quality system.

Our quality planning includes tooling and process development, a product specific control plan, training plans and a training matrix for all employees, and verification and validation of all products prior to being shipped to our customers

Brad Farver  
General Manager
